

Autism is epidemic! In 2010 the Centers for Disease Control reported that 1 in 68 children were identified with autism spectrum disorder, a 30 percent increase from 2008 and a 60 percent increase from 2006. Yet, there is really no such thing as Autism Spectrum Disorder, only undiagnosed children. Conventional doctors are no help because they are restricted by the guidelines of the American Medical Association. So what is a parent to do? *Beating Autism* is the personal story of Anne Evans's struggle to find answers to the cause and cure of her daughter's condition. Evans left the world of conventional medicine and found not only the source of her daughter's autism but clear steps to her complete healing through complementary and alternative medicine and allergy elimination. She found out how the underlying cause of any disease, including autism, could be determined and healed at the level of quantum physics without the use of expensive equipment, pharmaceuticals, or surgery. From that moment on, the Evans family used Integrated Chinese Medicine (ICM), and Nambudripads Allergy Elimination Techniques (NAET) to diagnose the condition of Sarah's brain tissue, analyze her dietary needs, detoxify her organs, and boost and redirect her own immune system to fight off invading pathogens without the use of antibiotics or psychotic drugs, or invasive procedures. Sarah showed improvement immediately and recovered completely. *Beating Autism* is the compelling and detailed story of Anne and Sarah Evans's three-year struggle battling and overcoming autism. It is a case study that includes full explanations of the daily drug-free treatments, details of the side effects and their durations, and a complete list of materials, metabolic and psychological tests, laboratories, and clinicians used. For the past fifteen years Sarah has been fully functional with no signs of the disorder. In *Beating Autism* you will find out how to set your child on a path to recovery and beat autism too. (Anne M. Evans)
