

The village labourer 1760-1832: a study in the government of England before the reform bill

Excerpt from *The Village Labourer 1760-1832: A Study in the Government of England Before the Reform Bill*. Many histories have been written of the governing class that ruled England with such absolute power during the last century of the old regime. Those histories have shown how that class conducted war, how it governed its colonies, how it behaved to the continental Powers, how it managed the first critical chapters of our relations with India, how it treated Ireland, how it developed the Parliamentary system, how it saved Europe from Napoleon. One history has only been sketched in outline: it is the history of the way in which this class governed England. The writers of this book have here attempted to describe the life of the poor during this period. It is their object to show what was in fact happening to the working classes under a government in which they had no share. They found, on searching through the material for such a study, that the subject was too large for a single book; they have accordingly confined themselves in this volume to the treatment of the village poor, leaving the town worker for separate treatment. It is necessary to mention this, for it helps to explain certain omissions that may strike the reader. The growth and direction of economic opinion, for example, are an important part of any examination of this question, but the writers have been obliged to reserve the consideration of that subject for their later volume, to which it seems more appropriate. The writers have also found it necessary to leave entirely on one side for the present the movement for Parliamentary Reform which was alive throughout this period, and very active, of course, during its later stages. Two subjects are discussed fully in this volume, they believe, for the first time. One is the actual method and procedure of Parliamentary Enclosure; the other the labourers rising of 1830.
