

## coronary heart disease risk factors(Chinese Edition)

Paperback. Pub Date :2007-11-1 Pages: 316 Publisher: Peoples Health Publishing House Currently, coronary heart disease is the number one killer of humans. Particularly in developing countries, the incidence of coronary heart disease continues to rise trend. In recent years, many celebrities at home and abroad due to heart attacks and premature death. Era of responsibility and mission-driven basic research in cardiology engaged scholars and clinicians fought side by side, working together to fight the ills of conquest. After generations fought, unyielding efforts, although not yet obtained the overall victory in the struggle, but has seen the dawn of initial success. The most gratifying is that, under the guidance of epidemiological research, through aggressive primary prevention interventions, some industrial countries continue to reduce coronary heart disease mortality.
